

Index of Contributors, Volume 13

- Aiello, Rita, *Comment on Andrea R. Halpern's Review of Musical Perceptions*, 121–124
- Bharucha, Jamshed J., *Melodic Anchoring*, 383–400
- Carroll-Phelan, Berenice, *Multiple Components of the Perception of Musical Sequences: A Cognitive Neuroscience Analysis and Some Implications for Auditory Imagery*, 517–562
- Croonen, W. L. M., *Two Ways of Defining Tonal Strength and Implications for Recognition of Tone Series*, 109–120
- Deutsch, Diana, *Preface*, 263–264
- Filz, Oliver, *The Dependence of Coherence Estimates of Spontaneous EEG on Gender and Music Training*, 563–582
- Fleming, Kevin J., *Timbre Reliance in Nonmusicians' and Musicians' Memory for Melodies*, 127–140
- Gjerdingen, Robert O., *Courtly Behavior*, 365–382
- Hampson, Peter J., *Multiple Components of the Perception of Musical Sequences: A Cognitive Neuroscience Analysis and Some Implications for Auditory Imagery*, 517–562
- Huron, David, *What is Melodic Accent? Converging Evidence from Musical Practice*, 489–516
- Johnson, Julene K., *The Dependence of Coherence Estimates of Spontaneous EEG on Gender and Music Training*, 563–582
- Katz, Bruce F., *Harmonic Resolution, Neural Resonance, and Positive Affect*, 79–108
- Krumhansl, Carol L., *A Perceptual Analysis of Mozart's Piano Sonata K. 282: Segmentation, Tension, and Musical Ideas*, 401–432
- Lerdahl, Fred, *Calculating Tonal Tension*, 319–364
- London, Justin, *Some Examples of Complex Meters and Their Implications for Models of Metric Perception*, 59–78
- Meyer, Leonard B., *Commentary*, 455–484
- Narmour, Eugene, *Analyzing Form and Measuring Perceptual Content in Mozart's Sonata K. 282: A New Theory of Parametric Analogues*, 265–318
- Palmer, Caroline, *Anatomy of a Performance: Sources of Musical Expression*, 433–454
- Panksepp, Jaak, *The Emotional Sources of "Chills" Induced by Music*, 171–208
- Parncutt, Richard, *review of The Musician's Guide to Perception and Cognition by David Butler*, 253–260
- Patterson, Roy D., *The Duration Required to Identify the Instrument, the Octave, or the Pitch Chroma of a Musical Note*, 1–16
- Petsche, Hellmuth, *The Dependence of Coherence Estimates of Spontaneous EEG on Gender and Music Training*, 563–582
- Pressing, Jeff, *Review of Thinking in Jazz: The Infinite Art of Improvisation by Paul Berliner*, 247–252
- Radvansky, Gabriel A., *Timbre Reliance in Nonmusicians' and Musicians' Memory for Melodies*, 127–140

- Repp, Bruno H., *Quantitative Effects of Global Tempo on Expressive Timing in Music Performance: Some Perceptual Evidence*, 35–58, review of *Shaping Time: Music, the Brain, and Performance* by David Epstein, 591–604
- Richter, Peter, *The Dependence of Coherence Estimates of Spontaneous EEG on Gender and Music Training*, 563–582
- Robinson, Ken, *The Duration Required to Identify the Instrument, the Octave, or the Pitch Chroma of a Musical Note*, 1–16
- Royal, Matthew, *What is Melodic Accent? Converging Evidence from Musical Practice*, 489–516
- Sandell, Gregory J., *Roles for Spectral Centroid and Other Factors in Determining "Blended" Instrument Pairings in Orchestration*, 209–246, review of *Auditory Display: Sonification, Audification, and Auditory Interfaces*, edited by Gregory Kramer, 583–590
- Simmons, Julie A., *Timbre Reliance in Nonmusicians' and Musicians' Memory for Melodies*, 127–140
- Tekman, Hasan Gürkan, *Cue Trading in the Perception of Rhythmic Structure*, 17–34
- Temperley, David, *Motivic Perception and Modularity*, 141–170
- von Stein, Astrid, *The Dependence of Coherence Estimates of Spontaneous EEG on Gender and Music Training*, 563–582
